DO YOU KNOW

that we are consulted by thousands of Buyers annually, who request to be "put in touch" with the manufacturers of the best products in particular lines of trade and that we are frequently asked to recommend the *one* which we consider to be *the* best?

If you are an advertiser we file your Catalog in our Library and our Information Bureau uses it in connection with making such recommendations.

"The Tank With A Reputation"

The best tank to install is the tank that has earned a reputation for strength, durability and satisfaction to owners. In other words the Caldwell Cypress Tank.

Added to the enduring quality of the cypress, you have correct design, high grade material and scientific construction by men who have been building tanks for 30 years.

Send for Catalogue.

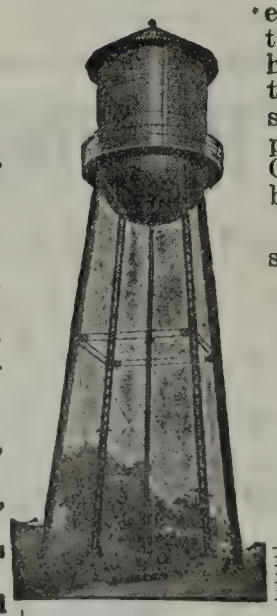
Caldwell

Towers Endure



Because every Caldwell Tower is built strictly according to approved engineering principles.

No tower can be built to give longer and more satisfactory service than the Caldwell Structural illustrated here. This tower is constructed on the same principle as the modern sky-scraper where permanence is paramount. Either the Caldwell Cypress or Hemispherical Tank can be used.

Caldwell Towers are built in all styles and sizes for all purposes.

For forty-six years G T D Screw Cutting Tools, Pipe Tools, Gages and Machines have been building a reputation for highest quality. The old familiar brand names, "Little Giant," "Lightning," "Green River," "OK," "Reece," "Wells," "Hercules" and "Nutter & Barnes," are now consolidated under the general trade mark

GTD

which means all that the old names have ever meant—and more—for it signifies the larger output, more complete standardization and steady improvement of all the lines made possible by the merging of these old and well established manufacturing concerns.

SHELL TOOLS Our quick operating expanding mandrels are efficient time savers. They assure uniform wall thickness and increased production. They are used extensively in this country and Europe on various size shells and give universal satisfaction. All steel construction, hardened and ground. Intended for constant hard usage. Grip regulated automatically by size of cut. Lock and release instantly with slight effort by the operator. Made from 75 M/M to 12". We also make nose drivers and centering mandrels for various size shells. Write for prices and deliveries.

General Machine Work

Automobile, Marine and Aeroplane Engine Parts in quantities to your blueprints. Light and heavy jobbing work of all descriptions. Also manufacturers of J. C. M. Co. Mandrels for holding all sizes of projectiles for outside turning.

EDWARDS FORGED STEEL TRUCKS

These are the trucks that the United States Government ordered—150 of them—for use in Pamana. And if ever any job called for hard, gruelling work, day in and day out, it surely was here.

Edwards Forged Steel Trucks are the culmination of thirty years' practical experience in working Iron and Steel. They defy destruction. They are strongest where old style wood frame trucks are weakest. Their principle of construction and leverage is quite different from that of the old style trucks.

A big advantage is found in their greater load capacity—their wonderful ease of operation—their surprising endurance and low upkeep cost.

One continuous piece "U" shaped frame supports the wheels in the most substantial and durable manner. The upper part of the continuous "U" frame gives perfect rigidity and strength. It will stand jolts and strains such as no mortised woodwork or other means of stiffening could possibly undergo.

They seem to have first call where heavy freight is handled by railroads, steamship lines, warehouses, machine shops, packing houses—and wherever else heavy duty is the order of the day.

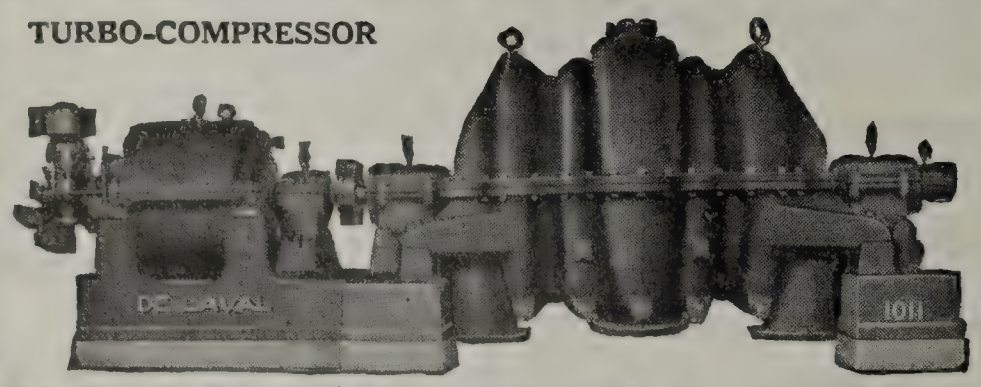
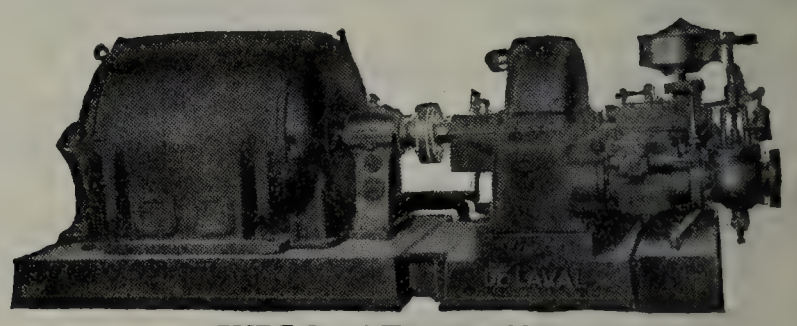
TURBO-COMPRESSOR





TURBO-ALTERNATOR

DE LAVAL STEAM TURBINES

are built in single-stage, pressure-stage and velocity-stage types for direct connection to electric generators, centrifugal pumps, compressors and for rope or belt drive. For slow and moderate speeds, the DeLaval Helical Speed Reducing Gear is employed, permitting the turbine to run at the best speed for efficiency and simplicity of construction, while the driven machine also operates at the most favorable speed. DeLaval Steam Turbines are suited for operation with high-pressure steam exhausting to condenser or atmosphere or against back pressure, for utilizing low-pressure steam, and for mixed-flow or extraction service **Write for Catalog "D55"**

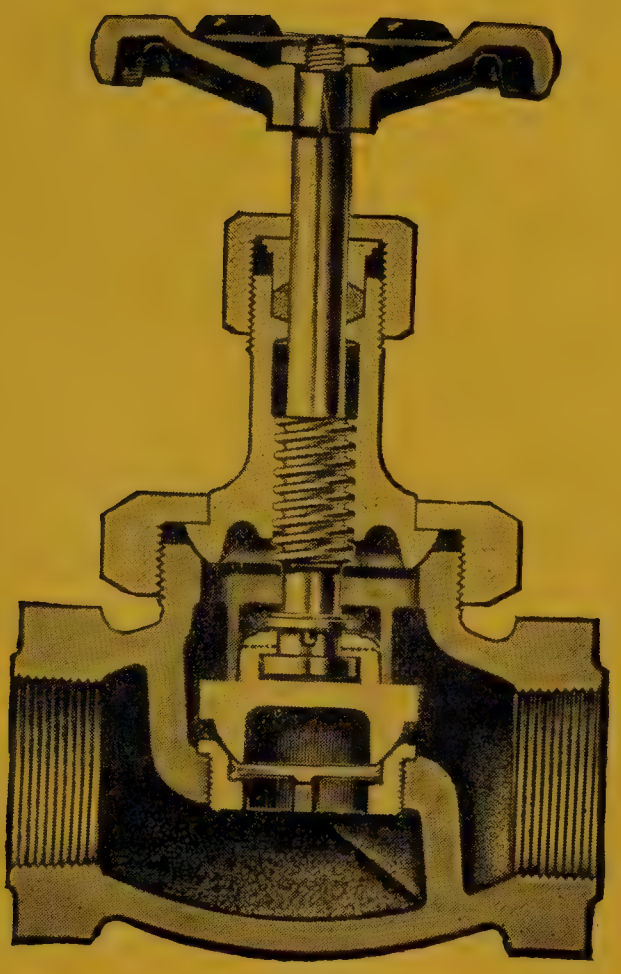
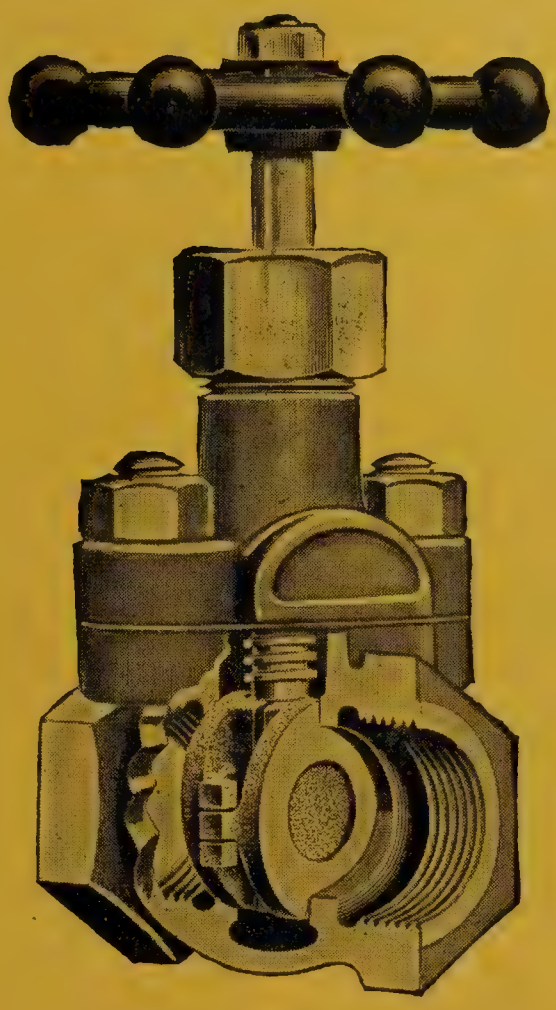
VALVES FOR EVERY PURPOSE EVERYWHERE



Colonial Valve Service Covers The United States



Solving the problem of fitting the right valve to every requirement has with us passed the experimental stage. Thousands of satisfied users, all over the country, testify to the efficiency and economy of Colonial Service. We have familiarized ourselves with every make of valve and every working condition. All you have to do is tell us your requirements and we supply the valves which will produce the best results.

You may stumble on the proper valve by shopping around and experimenting, but you will lose a lot of time and money that Colonial Service saves.

STRONG'S TISAFINE WIPER TOWELS

are made but for one purpose—to give engineers the one best wiper towel that can be made for the general use around engine rooms.

Strong's Tisafine Wiper Towels will **Clean—Will Polish Quick**—when you clean and polish quick—you save "elbow grease" and "time"—that saves you money.

Spongy—with great absorbent quality.

Soft—but extremely tough, owing to our using only the best quality of soft twilled yarn.

Strong's Tisafine Wiper Towels cost much less than the ordinary towels—and, as for quality, there is absolutely no comparison. Size —12 in. x 18 in.—just right for a good handful and as big as you want for general use. Reliable—Strong—Serviceable—Durable—Economical. No. 207. Price 12 in. x 18 in., 4c each.

Put up in bale lots of 1,000 Wipers.

ARMCO WELDING RODS

OXY-ACETYLENE and ELECTRIC

AMERICAN ARMCO INGOT IRON

ARMCO Filler Rods are offered with two strong initial recommendations:

First: **Manufacture of the raw iron with the skill and fidelity associated with all products of the American Roller Mill Co., and**

Second: **Drawing and control of all finishing operations under direction of the laboratory specialists of the Page Steel & Wire Co.**

A weld made with ARMCO Rods closely approaches the original strength per square inch of the original metal section and lends itself particularly well to subsequent hammering or other finishing treatment.

Two ARMCO rods, one for oxy-acetylene and another for electric, *do well* what has heretofore required a selection of one from ten to twenty grades.

ARISTOS "COPPERWELD" REG. U.S. PAT. OFF.

Drawn from the product of Copper Clad Steel Co., Pittsburgh

COPPERWELD COPPER CLAD STEEL WIRE

Copperweld is not a cure-all, but where some of the conductivity of solid copper wire can be sacrificed for greater tensile strength or where exposed steel conductors would corrode, Copperweld will make big savings.

Copperweld Copper Clad Steel Wire for the needed conductivity
—weighs much less than copper,
—has much higher elastic limit,
—has about 20% smaller diameter and therefore less projected surface exposed to wind pressure and capable of carrying sleet load

—and for the same cost you get much more Copperweld than solid copper wire.

Aerial Tramways

NO matter what the contour of the ground, we will construct a tramway that will transfer material at minimum expense; and no grades are too steep to surmount; no rivers or valleys too wide to cross; and no grading, bridges or viaducts of any kind are required. There is practically no limit to the length of these tramways.
